- Hospitals
- In-Patient Department
- Doctor Offices
- Walk-in Clinics
- Urgent Care
- Elective Surgery
- Dentist Offices
- Hospice Homes

Key Benefits of ICI Solutions

RAPID SCREENING
Screen temperatures in a mere of seconds, allowing your patients, staff, and visitors to arrive where they are needed, exactly when they are needed. Rapid screening keeps your appointments, procedures, and visits right on schedule.

SIMPLE, SAFE & STRESS-FREE PROCESS
Our easy to integrate systems allow for a stress-free process. Non-contact temperature screens are compatible with patients and doctors of all heights, making the process simple to use. ICI systems enable screening from a social distance, ensuring your staff operator is safe.

HIGHEST ACCURACY
When it comes to the health of your patients and staff, accuracy is critical. Our infrared systems are accurate to within ± 0.1° to ± 0.3° Celsius.

RELIABLE TRAINING & SUPPORT
We are here for you every step of the way. From setup assistance to staff training, we guide you in properly installing and using your new system.
Key Features of ICI Products

1. Centralized Monitoring
   Control all of your medical facilities' cameras from one centralized location.

2. Access Control Card
   Restrict access to certain doors, rooms, and buildings with our badge control feature.

3. Printed Badge
   Once scanned at a self-service kiosk, individuals receive a printed ticket containing their picture, temperature, and screening test result.

4. Inclusion of Declaration Form
   Add customized forms to your kiosk station to collect critical information.

5. Touchless or Touch Screen
   Touchless functionality is available on our kiosk products — the choice is yours.

6. Dual Visual Camera
   Display side-by-side views of both thermal and traditional camera images.

7. Red Light / Green Light Signals
   Easily identify normal and elevated body temperatures with a red light/green light signal system.

8. Light Alerts
   Green or red lights signal a pass/fail temperature screening test.

9. Audible Alert
   The ICI system produces an audible alarm when an elevated temperature is detected.

10. Email & Text Notifications
    Receive internal email and text notifications when an individual fails a temperature test so your staff can take the necessary actions.

11. Facial Detection
    Facial detection software results in a quicker temperature scan and less time waiting in line. Data is not stored to protect privacy.

12. Facial Recognition
    Facial recognition technology can be enabled to track employees for increased safety and security within your building.

Our Solutions Include
